Experience

Remote Senior Backend Developer *(mid 2017 - today)* Madrid — Spain

(Late 2018 — Late 2021) Part of a talent hub called StackBuilders and working at Twilio as a senior Python dev, helping them have one of the best automated systems for communication and beautiful and up-to-date online documentation of their products.

(Mid 2017 — Late 2018) I continued to work for Imagination with the same responsibilities, only 100% remotely.

Imagination *(2015 — mid 2017)* London — United Kingdom
Senior Backend Developer as part of the Tech Studio team.
We developed Imagination's onsite show Platform (XPKit) from scratch.
Focused on user experience, based on self-created and self-managed microservices/APIs.

Stonework Solutions *(2012 - 2015)* Madrid - Spain
Backend Developer and Head of the Development team.
I was in charge of new projects managing a small group of developers in a start up environment.
We developed tools for VoIP service clients, security applications in telecommunications and media.
Live dashboards, routing apps and fraud control.

Efors *(2011 - 2012)* Berlin - Germany
I was a backend and frontend programmer. This was a very small start up and I had to learn and develop
on whatever was needed. Mostly web projects.

Education

Universidad Carlos III de Madrid *(2005 - 2009)* Telecommunication Engineering

IES Vírgen de la Paloma *(2009 - 2011)* Superior Technician Degree: Computer Programming, Web Developing and Applications Design
